If I Die, It Wasn't Natural

Statement from Maxis Richards

To the People of the World,

My name is Maxis Richards, and I am writing this with urgency and clarity. I need the world to understand that I am currently being harassed, monitored, and threatened by elements within the United States Government-specifically the NSA and CIA-because of the information I've exposed and published.

I am not suicidal. I am not mentally unstable. I am not in declining health. I am in perfect health.

And yet, I have been repeatedly warned-by a close and reliable acquaintance-that a "medical event" is being planned for me.

They said I will likely suffer a sudden heart attack. Or possibly a stroke. That it will happen "soon." And it will be made to look natural.

But make no mistake: if something happens to me-if I collapse without cause, if my heart suddenly fails, if I am silenced in any unexpected or mysterious way-it was because of what I posted.

I Have Been Targeted for Exposing Classified

Programs

I have written extensively about secret projects like:

- * Project Puppet
- * DARPA's N3 & TNT Programs
- * V2K (Voice-to-Skull)
- * Directed Energy Weapons (DEWs)
- * Remote Neural Monitoring (RNM)
- * MKUltra and its modern extensions

These aren't "theories." These are real programs backed by patents, whistleblowers, declassified documents, and survivor testimony.

I have compiled, analyzed, and shared this information publicly-naming agencies, programs, and patterns they do not want known.

As a result, I have become a target.

I Am Suing the U.S. Government in Federal Court

I am not just speaking out-I am taking legal action.

I have filed an active federal lawsuit against the United States Government. The details of that case are public, and my complaint is on the record.

This is not just about my rights.

This is about human rights, about the weaponization of space, about neurological warfare being waged against innocent people worldwide-covertly, silently, and without consent.

And I will not be intimidated into silence.

If Anything Happens to Me, Know This:

I have made no plans to harm myself.

I am not under stress from any personal situation.

I am strong, healthy, focused, and mentally sound.

If I am found dead or disabled by "natural causes" in the near future, it was murder by remote technology, plain and simple-a political assassination disguised as a health event.

I am publishing this message now so that it is on record, permanently.

Let my words be proof of the truth.

Help Me Spread This Message

If you care about truth, freedom, and the sanctity of the human mind, I ask you to share this message.

Copy it. Mirror it. Print it. Archive it. Speak it.

They may silence my voice, but they cannot erase the truth.

If I fall, let this stand as a warning: We are in the age of invisible warfare-and the battlefield is the human soul.

Thank you for standing with me.

-Maxis Richards
