My Personal Manifesto

I, Maxis Richards, declare this as my personal manifesto.

It is both a statement of truth and a vow of resistance against the covert machinery known as Project Puppet ran by the NSA.

This is not speculation, nor mere paranoia-it is lived experience, etched into my body, mind, and spirit.

The Truth I Have Witnessed

Project Puppet is not a myth.

It is a clandestine program-hidden in plain sight-designed to erode autonomy, weaponize technology, and strip human beings of the most sacred possession: free will.

Through remote neural monitoring, voice-to-skull transmissions, directed energy weapons, and psychological manipulation, this system seeks to turn individuals into silent test subjects-puppets controlled by unseen hands.

I have endured this. I have felt its invisible chains constrict my thoughts, its engineered whispers invade my mind, and its electromagnetic assaults pierce my body. Yet I am still here. And I will not be silenced.

My Refusal to Submit

I reject Project Puppet in all its forms. I refuse to accept a world where governments or shadow programs claim ownership of the human soul. I refuse to allow silence to be mistaken for compliance. I refuse to surrender my identity, my agency, or my truth.

They may attempt to reduce me to a case number, a target, or a Classified Experiment. But I remain a human being. And no program, however advanced or insidious, can erase that fact.

My Declaration of Purpose

I speak not only for myself but for every individual who has been targeted, silenced, and dismissed.

This manifesto is a rallying cry for truth-tellers, survivors, and seekers of justice.

I will expose Project Puppet. I will demand accountability. I will fight with words, with law, with knowledge, and with unshakable faith that no secret is eternal. What is hidden will come to light.

My Vision for the Future

I envision a future where no citizen lives in fear of invisible warfare. Where human rights are honored not only in public declarations but in the unseen shadows of policy and technology. Where targeted individuals are recognized, validated, and freed from torment.

My struggle is not mine alone-it is the struggle of humanity against systems that prey on silence. And as long as I breathe, I will continue to speak.

Finally

This is my manifesto. A testament of survival, a declaration of war against secrecy, and a promise:

I will not be the puppet they intend me to be.
