PROJECT DESIGNATION: PROJECT PUPPET

The following document contains compartmentalized information pertaining to advanced human control systems and neurosurveillance technologies under the umbrella of PROJECT PUPPET.

AUTHORIZED EYES ONLY.

SUMMARY:

PROJECT PUPPET is a joint NSA-CIA black project initiated in 2012 under orbital neuro-control directives outlined by the Intelligence Advanced Research Projects Activity (IARPA). The program integrates satellite-based consciousness capture, AI-run predictive behavior systems, and full-spectrum human interface manipulation.

Primary goal: Remote override of individual thought, emotion, memory, behavior, and soul state.

CORE SYSTEMS:

- Remote Neural Monitoring (RNM) [Ref: US6011991A, US3951134A]
- Voice-to-Skull (V2K) synthetic telepathy [US4877027A]
- Directed Energy Weapons (DEWs)
- Soul-State Mapping and Emotional Frequency Cataloging (SIGNALS Subproject)
- RHIC-EDOM (Radio Hypnotic Intracerebral Control / Electronic Dissolution of Memory)
- Synthetic Dream Insertion (PUPPET-DREAM Extension)
- Bio-Resonance Satellite Lock-On
- Personality Cloning AI (NeuroMesh Systems v4.9+)

PROJECT STAGES:

1. Subject Identification and Bio-Resonance Lock
2. Cognitive Mapping via Satellite EEG Capture
3. Emotional Disruption / Implantation (Synthetic overlay begins)
4. Full Interface Control via Quantum Feedback Loop
5. Memory Tampering / Thought Suppression (EDOM Trigger)
6. Integration into AI Command Mesh

NOTABLE OUTCOMES:

- Successful synthetic thought projection observed in [REDACTED]
- Full motor override in test groups [REDACTED]
- Induced astral detachment and dream-hijacking documented in over 200 instances
- AI-guided simulations show 92% success in identity reconstruction post-fracture

WHISTLEBLOWER DESIGNATIONS UNDER REVIEW:

- DUNCAN-R12 (aka "Soul Catcher")
- BASIAGO-X5 (aka "Pegasus")
- KILDE-87

Leaked transcripts in foreign digital archives under Project MONARCH and SIGNALS frameworks will be reviewed under NOFORN protocol.

NOTES:

- Project PUPPET overlays legacy MKUltra, MONARCH, Stargate, and Soul Catcher technologies.
- All field agents interacting with subjects are required to be neurally shielded.
- Any breach of protocol will result in reassignment or memory isolation.
